

UNIVERSITY AVENUE CHURCH RENOVATION

Location	Austin, Texas
Project Type	Religious
Year	2009 Scheduled Completion
Size	11,875 SF
Client	University Avenue Church of Christ

Located at the southern entry of the University of Texas, the University Avenue Church of Christ occupies a strategic position toward extending ministry to the campus. Unfortunately the original early twentieth century structure was not designed with generous spaces for gathering that allow fellowship to occur. The proposed renovations and additions would provide much needed classroom space, but much more importantly the renovation would create a large two-story high entry hall adjacent to the sanctuary. This new "front door" would provide a light-filled, spacious area to welcome congregants and visitors alike. Fellowship hall space is expanded as well so that the entire congregation can gather and enjoy a meal and time of celebration.
